

The background is a blue gradient. In the corners, there are white line-art illustrations of circuit boards or neural networks, with lines connecting to small circles.

AI AFFECT RECOGNITION SESSION ONE RECAP

Using Affect Recognition to Establish Good Research Habits

BEGIN SESSION TWO

Quick check-in. Rate from 1 (strongly disagree) to 5 (strongly agree)

- 1) I completed Tasks 2 and 3 and the reflection questions
- 2) I found at least one source in Task 3 that requires validation (by other sources) to be believed
- 3) The company About pages I read raised concerns for me
- 4) I am ready to share at least one finding with the group

COMPANY WATCH#1

You looked at a company's About page.
What did it tell you — and what do you think
it was designed not to tell you?

COMPANY WATCH#2

Did either company you researched make explicit claims about informed consent or privacy? Do you find those claims convincing? Why or why not?

COMPANY WATCH#3

Based on what you found, who do you think this company's technology is primarily serving — the public, or its clients? What evidence supports that?

SOURCE CHECK#1

What was the single biggest signal of potential bias you found in one of your sources? What made it stand out?

SOURCE CHECK#2

Did the authors of your source use their own original data, or did they rely on data from elsewhere? Does that change how much weight you give to their conclusions?

SOURCE CHECK #3

You rated your sources on a 1–5 bias scale.
Would you rate the AI-generated document
on the same scale? What score would you
give it, and why?

TRUST THE MACHINE?#1

After Tasks 2 and 3, is there a specific claim in the Claude document that you now trust less than you did when you first read it? What changed your mind?

TRUST THE MACHINE?#2

The document was written by an AI that cannot directly quote copyrighted sources. What does that mean for how you should read any AI-generated document that claims to represent an author's ideas?

TRUST THE MACHINE?#3

The document cites its own limitations — a retracted paper was removed, figures were corrected. Does that transparency make you trust it more, or does it raise more questions than it answers?

CRAWFORD SAYS#1

What is one argument Crawford makes in Chapter 5 that you think the Claude document captured well? What makes you confident it's accurate?

CRAWFORD SAYS#2

What is one argument Crawford makes that you think the Claude document softened, simplified, or missed entirely?

CRAWFORD SAYS#3

Crawford wrote this book in 2021. Based on what you researched in Tasks 2 and 3, is her argument more or less relevant in 2026 than when she wrote it?

EXPLAIN THIS#1

So far, what is the most unsettling thing you learned or discovered — and why does it unsettle you?

EXPLAIN THIS#2

If you had to explain to a family member why affect recognition technology matters to them personally, what would you say?

EXPLAIN THIS#3

Has anything in this lesson provided you with useful insight in your course final project?
